

Central California Foundation for Health
Notice to Attorney General Pursuant to CA Corp. Code Section 5920

Sect. 999.5(d)(5)(G)

If the agreement or transaction will have any impact on reproductive health care services provided by any facility that is the subject of the agreement or transaction, or an impact on the availability or accessibility of reproductive health care services, a description of all reproductive health care services provided in the last five years by each health facility or facility that provides similar health care services that is the subject of the agreement or transaction. This description shall include the types and levels of reproductive services including, but not limited to, information about the number of pregnancy terminations and tubal ligations and a description of how this information was compiled.

It is not expected that the proposed transaction will have any impact on the Applicant's provision of reproductive health services. Pursuant to the Affiliation Agreement, Adventist Health is obligated, throughout the 10-year term of the Affiliation Agreement, to operate the Hospital as a general acute care hospital with not less than its current licensed bed count (105 general acute care beds and 51 skilled nursing beds), providing not less than the specialty services for which the Applicant is currently licensed, including OB-GYN. Moreover, given that the Affiliation Agreement obligates Adventist Health to develop and open a new inpatient obstetrics and delivery facility on the Hospital campus, the proposed transaction will, if anything, enhance the delivery of reproductive health services.

In addition to reproductive health services provided at the acute care hospital, the Applicant also provides reproductive health services at the Delano Women's Clinic, located in the City of Delano.

Data for specific reproductive health services provided by the Applicant in the past five calendar years is set forth below.
